

Electromagnetic safety release
(no compressed air required)
Thus, extremely flexible, since only a corresponding power connection is required!

Low rise scissor lift

Item No.: TWS35-10E

kg 3500 kg **1,00 m** **230 V or 400 V** **Autom.**

Description

Tyre service scissor lift with 1 m lifting height and 3500 kg load capacity. For lifting cars up to 3.5 t. Optimal for tyre services, car body construction, vehicle preparation. The scissor lift can be moved by the mobile kit (optionally available) and can therefore be used as an additional workplace on any sufficiently paved ground, such as asphalt, paving or concrete floor. With electromagnetic release (no compressed air connection is required). Lockable, fully loadable drive-up ramps for a longer pickup area.

Features

- 1A Quality built with CE-Certificate
- Manufactured in accordance to ISO 9001
- Mechanical synchronization control of both lifting platforms for perfect synchronism
- Low drive over height (110 mm)
- **FAILSAFE safety lock system (monitoring of the detent position)** | Rocker arm system
- **Double line system for symmetrical distribution of the system pressure**
- High quality solid construction
- Emergency lowering function in case of power failure
- **Direct actuation by two powerful hydraulic cylinders**
- Automatic safety lock | Foot protection
- Acoustic warning signal (foot protection)
- High quality powder coating

Delivery contents

- Lift incl. Power unit | Rubber blocks
- English instruction manual
- Examination book | CE-Certificate
- **Assembly video online | Product video online**
